

## Barinthus Bio Promotes SNAP-TI Co-inventor, Geoffrey Lynn, M.D., Ph.D. to Chief Scientific Officer

Nov 25, 2024

OXFORD, United Kingdom and GERMANTOWN, Md., Nov. 25, 2024 (GLOBE NEWSWIRE) -- Barinthus Biotherapeutics plc (NASDAQ: BRNS) ("Barinthus Bio"), today announced the promotion of Geoffrey Lynn, M.D., Ph.D. to Chief Scientific Officer (CSO), effective as of December 1, 2024. Dr. Lynn succeeds Nadège Pelletier, Ph.D. who decided to pursue alternative opportunities closer to home after having served as Barinthus Bio's CSO since early 2023. Barinthus Bio is a clinical-stage biopharmaceutical company developing novel immunotherapeutic candidates that guide T cells to control disease.

"Dr. Pelletier's strong vision and leadership have resulted in a robust preclinical pipeline of promising leads for targeting autoimmune and other inflammatory diseases. She has played a pivotal role in the new company structure and across all R&D activities," said Bill Enright, Chief Executive Officer of Barinthus Bio. "We're very grateful for Dr. Pelletier's contributions to our growing pipeline and expect a smooth transition with the appointment of Dr. Lynn. As co-inventor of the SNAP-TI technology, he is a natural successor into the CSO role."

Dr. Pelletier will remain with the Company until the transition of responsibilities to Dr. Lynn is complete.

"This is an incredibly exciting time for Barinthus Bio. We have achieved functional cures with VTP-300 in patients with chronic hepatitis B, and VTP-1000, our first product candidate developed using the SNAP-TI technology, recently entered the clinic in a Phase 1 trial for individuals with celiac disease," said Dr. Lynn. "Dr. Pelletier has put Barinthus in a strong position with a compelling pipeline of assets, including our first program in the autoimmune disease space, and I look forward to building on this momentum while also exploring new opportunities to build value."

Dr. Lynn is a seasoned biotech innovator and executive with over 15 years of experience leading immunotherapeutic R&D from discovery through early development. Prior to joining the Company, Dr. Lynn led Avidea Technologies, Inc. as CEO and Founder from its launch at Johns Hopkins FastForward in 2017 through to its acquisition by Barinthus Bio in 2021. Dr. Lynn holds a M.D. from the Johns Hopkins University School of Medicine (US), as well as a D.Phil. from the University of Oxford.

### About Barinthus Bio

Barinthus Biotherapeutics (Nasdaq: BRNS) is a clinical-stage biopharmaceutical company developing novel immunotherapeutic candidates designed to guide the immune system to overcome chronic infectious diseases and autoimmunity. Helping people living with serious diseases and their families is the guiding principle at the heart of Barinthus Bio. With a focused pipeline built around its proprietary platform technologies, Barinthus Bio is advancing immunotherapeutic product candidates in infectious diseases and autoimmunity, including: VTP-300, that utilizing its ChAdOx/MVA platform designed as a potential component of a functional cure for chronic HBV infection and VTP-1000, utilizing our SNAP-Tolerance Immunotherapy (SNAP-TI) platform and is designed to treat people with celiac disease. Barinthus Bio is also conducting a Phase 1 clinical trial for VTP-850, a second-generation immunotherapeutic candidate designed to treat recurrent prostate cancer. Barinthus Bio's differentiated technology platforms and therapeutic approach, coupled with deep scientific expertise and focus on clinical development, uniquely positions the company to navigate towards delivering treatments that improve the lives of people with chronic infectious diseases and autoimmunity.
